CONCEPTS & SOLUTIONS
for SHOWER ROOMS & WASHROOMS

CAMPSITE SYSTEMS

Hygienic | Safe | Modern | Faultless?

Camping means retreating to the great outdoors, but nature itself – especially the weather – can put a strain on facilities and operators. External factors such as wind and water significantly affect the durability of campsites, restaurants and sanitation systems.

At the same time, the wide range of regulations and numerous requirements that must be met, as well as rising energy costs, pose an ever greater challenge to campsite operators in their efforts to practice sustainable management. Not to mention the construction and conversion measures needed in the event of storm damage.

For sanitation systems in particular, it is not only these factors that are important, but also compliance with the German Drinking Water Ordinance. At the same time, the facilities need to be modern, appealing and hygienically impeccable, even when there are large numbers of visitors. Because today's customers have high expectations of campsites.

We're here for you!

We can help you to meet all these requirements. With CONTI+, you have a partner at your side with concepts, solutions and services for new building projects and the refurbishment, renovation and modernisation of your existing systems – cost effective, resource-efficient and sustainable offerings that are tailored to your needs.

New and existing systems

SHOWER ROOM

Concealed showers & shower panels
Cover extensions & special covers
Water inlet adjustment
Decentralised hot water generation
Retrofitting of existing shower systems

WASHROOM

Washbasin & wall mounted faucets
Multiple faucet assembly kits
Decentralised hot water generation

TOILET

Urinal flush valves
Conversion of existing urinal flush valves from
a wide range of manufacturers

COLD WATER RINSE

Next-generation shower rooms & washrooms

SMART

Networked, digital control
Service APP & CNX water management system

CONTI+ THERMOSTAT-E

Next-generation shower rooms & washrooms

Unique campsites are characterised by comprehensive architectural concepts. Our CONTI+ CONPRIMUS shower panel and our CONTI+ lino PRIMUS L40 washbasin faucet perfectly combine technology, safety, hygiene and design.

The electronically controlled Thermostat-E boasts an intelligent, patented design and many innovative functions – heralding a new era in sanitary rinsing. It allows a separate cold water rinse, sanitary rinse with selectable target temperature and thermal disinfection with hot water.

When integrated into our CONTI+ Service APP or the CONTI+ CNX water management system, the latest functions and sanitary rinses can be adjusted, controlled and documented digitally. In addition, water consumption can be individually adjusted so that no drinking water is wasted. This means significantly reduced costs and resource use.

The design and colour schemes reflect the personality of the campsite and can be carried through into washrooms with CONTI+ CONPRIMUS shower panels in a RAL colour of choice. Round off your washroom in terms of both hygiene and colour.

The perfect team

- Electronic temperature control
- Electronic anti-scald protection
- Temperature sensor and LED temperature display
- Cold water rinse
- Sanitary rinse (mixed water)
- Thermal disinfection
- Stagnation prevention
- Smart individual and central control

SHOWER ROOM & WASHROOM SOLUTIONS

The perfect combination of technology and hygiene

Unique, versatile, dependable and innovative: just some of the words that describe our comprehensive range of electronic and mechanical showers and washbasin faucets as well as urinal flush valves for public, semi-public and commercial buildings. These are combined with the CONTI+ products to create smart system solutions and comprehensive hygiene concepts. CONTI+ products enable sustainable use of drinking water and offer maximum safety and hygiene.

Our high performance solutions allow unprecedented creative scope for designing contemporary shower rooms and washrooms that will last into the future.

CONTI+ hygiene features

- Materials suitable for drinking water
- Non-porous, easy-clean surfaces
- Touch-free operation
- Automatic touch-free locking function
- Keeping drinking water installations free of germs
- Retention of germs at sampling points
- Low aerosol
- Easy maintenance
- Cold water rinse, electronic
- Sanitary rinse, electronic
- Thermal disinfection electronically, manually and with additional safety via key switch
- Documented operating and hygiene functions

A NEW ERA IN
SANITARY RINSING

CONTI+ CONVERSIONS

Always state of the art technology

CONTI+ offers a wide range of advanced shower technologies and faucet bodies designed to satisfy any refurbishment requirement. No matter what faucet body is already in use, practically any system can be converted with ease thanks to hole centres remaining constant over decades and the sophisticated design of the concealed unit and water inlet. Even 50-year-old faucets from CONTI+ and other manufacturers can therefore be effortlessly updated to meet the latest standards in technology, hygiene and design in just a few hours, without having to replace any tiles. This not only saves time, but also costs.

Versatile refurbishment and renovation options

Individual components can be converted, while entire systems can be integrated into the innovative CONTI+ CNX water management system or an existing building management setup. In addition, existing shower systems based on the CONTI+ CONGENIAL adaptive multifunctional water inlet can incorporate various options in further design steps. For maximum comfort, the highest efficiency and sustainable resource management.

Centralised & decentralised water heating

Today more than ever, energy is a precious commodity – but energy savings must not be at the expense of hygiene, even if only cold water connections are available. Hot water directly at the point of use and as required: enjoy fresh, comfortably warm water that is always available immediately, with no preheating time, by opting for our CONTI+ CONFRESH shower panel with fresh water module and integrated plate heat exchanger combined with the matching CONTI+ lumino+ L10c with small tankless water heater

Dependable & innovative

Hygienic, smart shower room and washroom concepts to improve quality of life have been the hallmark of the CONTI+ brand for 50 years.

With our innovative technologies, broad product portfolio and comprehensive range of services, we offer optimum solutions to meet all our customers' needs for new build and refurbishment projects. Impressive, flexible all-round expertise.

From advanced electronic and mechanical shower systems, washbasin faucets and urinal controls through to washbasins, as well as complete washroom equipment and water management systems, we take an integrated approach to all products and system solutions, with a strong focus on sustainability, hygiene and reliability. As a result, the CONTI+ brand is respected among design engineers and architects as a professional partner.
